Abstract

A clear and well-documented LaTeX document is presented as an article formatted for publication by CEUR-WS in a conference proceedings. Based on the "ceurart" document class, this article presents and explains many of the common variations, as well as many of the formatting elements an author may use in the preparation of the documentation of their work.

Keywords

LaTeX class, paper template, paper formatting, CEUR-WS

1. Introduction To The Task

blah blah

2. Literature Review

blah blah

3. Citations and Bibliographies

The use of BibTeX for the preparation and formatting of one's references is strongly recommended. Authors' names should be complete — use full first names ("Donald E. Knuth") not initials ("D. E. Knuth") — and the salient identifying features of a reference should be included: title, year, volume, number, pages, article DOI, etc.

The bibliography is included in your source document with these two commands, placed just before the `\end{document}` command:

```
\bibliography{bibfile}
```

where "`bibfile`" is the name, without the "`.bib`" suffix, of the BibTeX file.

Woodstock'22: Symposium on the irreproducible science, June 07–11, 2022, Woodstock, NY

*You can use this document as the template for preparing your publication. We recommend using the latest version of the ceurart style.

*Corresponding author.

3.1. Some examples

A paginated journal article [1], an enumerated journal article [2], a reference to an entire issue [3], a monograph (whole book) [4], a monograph/whole book in a series (see 2a in spec. document) [5], a divisible-book such as an anthology or compilation [6] followed by the same example, however we only output the series if the volume number is given [7] (so series should not be present since it has no vol. no.), a chapter in a divisible book [8], a chapter in a divisible book in a series [9], a multi-volume work as book [10], an article in a proceedings (of a conference, symposium, workshop for example) (paginated proceedings article) [11], a proceedings article with all possible elements [12], an example of an enumerated proceedings article [13], an informally published work [14], a doctoral dissertation [15], a master's thesis: [16], an online document / world wide web resource [17, 18, 19], a video game (Case 1) [20] and (Case 2) [21] and [22] and (Case 3) a patent [23], work accepted for publication [24], prolific author [25] and [26]. Other cites might contain 'duplicate' DOI and URLs (some SIAM articles) [27]. Multi-volume works as books [28] and [29]. A couple of citations with DOIs: [30, 27]. Online citations: [31, 17, 32, 33].
